SUMMARY

Software Engineer with 15 years of software engineering experience, including 9+ years building production services in Go. I've worked across high-traffic messaging and fintech SaaS platforms for digital identity and e-signature, with hands-on experience in PostgreSQL, MySQL, AWS and Docker. I bring a strong production mindset to backend design, reliability, and troubleshooting, and enjoy helping teams ship secure, maintainable services through technical guidance and mentoring.

SKILLS

Languages	Go (Golang), PHP (Laravel), Elixir, SQL
Databases	PostgreSQL, MySQL/MariaDB – relational modeling, SQL tuning
Cloud & DevOps	AWS, Docker, Linux server administration, CI/CD, monitoring & alerting
Practices	REST API design, scalable system architecture, Scrum/Agile, technical design documentation, code review & mentoring

EXPERIENCE

PT Privy Identitas Digital (PrivyID) Aug 2023 – Jul 2026

Senior Software Engineer • Yogyakarta

- Design and evolve highly scalable backend services for Indonesia's leading digital-identity and e-signature SaaS platform (Go, PostgreSQL, Docker), serving enterprise clients in regulated industries.
- Troubleshoot production issues in a large evolving codebase; improve monitoring and alerting to detect problems proactively.
- Author technical design documents; mentor engineers on Go best practices, testing, and code review.
- Work in Scrum ceremonies with product, security, and compliance stakeholders to ensure performance, security and reliability of authentication and verification services.

PT Privy Identitas Digital (PrivyID)

Backend Engineer • Yogyakarta Jul 2020 – Jul 2023

- Built and maintained REST APIs in Go and PHP powering identity-verification and digital signature workflows at production scale.
- Operated PostgreSQL/MySQL data stores and Linux infrastructure behind daily production traffic.
- Containerized services with Docker and improved the deployment pipeline toward continuous delivery.

Hellochat.id
Backend Engineer • Yogyakarta Sep 2019 – Apr 2020

- Developed real-time messaging backend services in Go on AWS; managed PostgreSQL databases and cloud infrastructure.

HiApp
Backend Engineer • Yogyakarta Jan 2017 – Aug 2019

- Built and maintained backend services for a messaging platform using Go and Elixir, deployed with Docker on AWS.

Eventlink Indonesia Jul 2016 – Dec 2016
Backend Engineer • Yogyakarta

- Built backend services and REST APIs for an event-management system using Laravel (PHP) and PostgreSQL.

Ajaib Nov 2015 – Jun 2016
Backend Engineer • Yogyakarta

- Developed backend services and APIs for a personal-assistant application using Laravel (PHP) and PostgreSQL.

PT Gamatechno Indonesia Jul 2011 – Oct 2015
Software Developer • Yogyakarta

- Developed financial web applications for budgeting, finance, and accounting on GTFW, the company in-house PHP framework.

EDUCATION

Digital Technology University of Indonesia (UTDI) – Bachelor of Science (B.Sc.) in Information Technology, 2017 - 2020
Part-time program for working professionals, completed alongside full-time work.
